Disclosure:

Please note that this report is compiled by Dr Fiona Lacey who has a financial interest in Mogumber Park.

Comments:

In my opinion, based on the radiographic views selected, this horse has no radiographic changes which are likely to have a significant influence on its ability to perform as an athlete. It is important to note that these radiographs were not taken within the recommended time frame for sale.

The above report is compiled for the sole benefit of the vendor. Potential purchasers are advised to seek the opinion of their own veterinarian in interpreting any radiographic changes present. The interpretation of radiographs and findings may vary with the examiner and a horse's changing condition. These radiographs are taken as a survey of the most common sites for a lesion. They are not, nor are they meant to be, a complete examination of the joints radiographed.
